

Forever 9

Some Angels Choose Fur
instead of wings.....

About Us

After having devoted years into volunteer work for animal welfare, we decided to start Furever 9 Corporation.

Furever 9 Corporation is the leading manufacturer and supplier of innovative and quality pet care products especially formulated by highly experienced veterinary experts and herbalists. We have a wide range of products to ensure the well-being of pet life.

Our mission is to ensure high-quality pet care products at some of the most competitive prices around.

Our dedication for creating an exceptional experience for our customers is the natural result of our own individual experiences of pet parenting. Hence, we ensure that our products fulfill all the quality and safety standards and are highly efficient.

SO, WHY WAIT?

Be pet smart and choose Furever 9 for pet's most vital needs!

Our Values

Our company was founded with the purpose of helping homeless animals by providing food, shelter and medical support to as many as possible.

A Portion Of The Company's Profits Go Directly For The Animal Welfare.

So more you give Furever 9 care to your pet, more we help stray animals to live a better life.

Here, every team member shares a special connection with animals and puts their heart and soul in improving animal lives.

Numerous animals in our country will be starting the coming year with the most difficult circumstances staring them in the eye: abuse, neglect, hunger and homelessness. Your help can result in more rescues, second chances and loving homes for every animal in distress.

Stand With US And We All Will Stand Together For THEM!

TABLET

DEWORMpet (Deworming tablets for dogs)

Dewormpet is a broad spectrum "chewable " deworming tablet for the control of gastrointestinal worms and tapeworms of dogs and puppies. It is active against roundworms, whipworms, hookworms, and pinworms.

Dewormpet contains 3 active ingredients having different modes of action and spectra of activity. Praziquantel is active against cestodes (tapeworms). Following exposure to praziquantel, the tapeworm loses its ability to resist digestion by the dog or cat. Because of this, whole tapeworms, including the hooks, are very rarely passed after administration of praziquantel. In many instances only disintegrated and partially digested pieces of tapeworms will be seen in the stool. The majority of tapeworms are digested and are not found in the feces.

Pyrantel pamoate is active against hookworms and ascarids. Pyrantel pamoate paralyzes the worms and the peristaltic action of the intestinal tract then eliminates the parasite which will be seen in feces.

Febendazole is active against roundworms, whipworms, hookworms, pinworms, and tapeworms in pets.

Each Tablet Contains:

Praziquantel 50mg
Pyrantel Palmoate 144mg
Febendazole 500mg

Directions:

1 tablet per 10 kg of Body weight or as directed by veterinarian.
